Projects

Project Name:	AR Aging Report and Field Expansion on the Existing reports		
Role	Senior Technical Lead		
Duration	January 2014 to Present		
Environment (with skill versions)	Database :	DB2	
		Tools :	Web Focus, SQL
		O/s :	Windows 7

About AR Aging Report:

Account Receivable Aging Report provides the details about the payments received from the clients after product is delivered to them. With the data from AR Aging Report business leaders will come to know how well they are getting payments from client after delivering the products. Based on that the business would like to understand activities being performed by their employees, Identify opportunities, Identify root causes and Take action!

About Field Expansion effects on Existing reports:

In Field Expansion Impact on existing report, there were changes in the field length of the existing columns due to business need. As part of the project we had to identify the reports which will get impacted, do the necessary code changes and do the proper testing of the report to make sure all the existing reports are working after the changes in the fields.
